## LOGO STRUCTURE

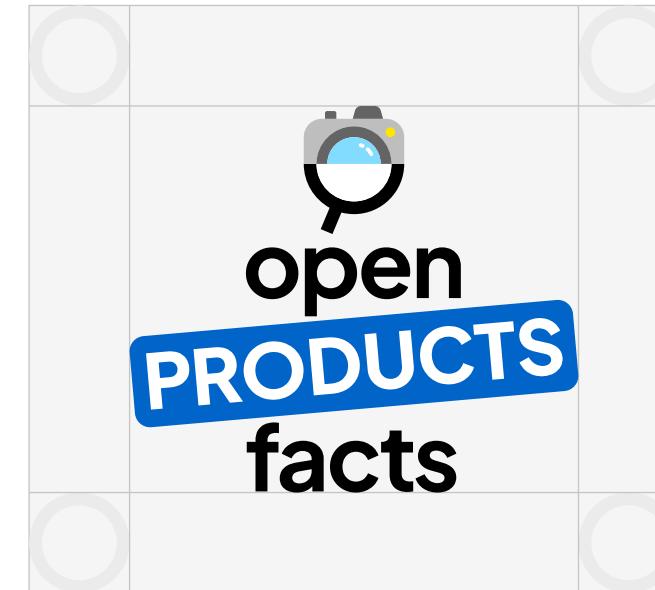

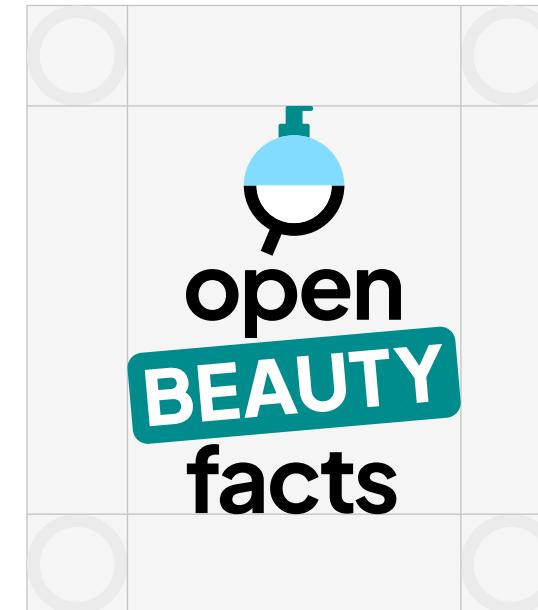

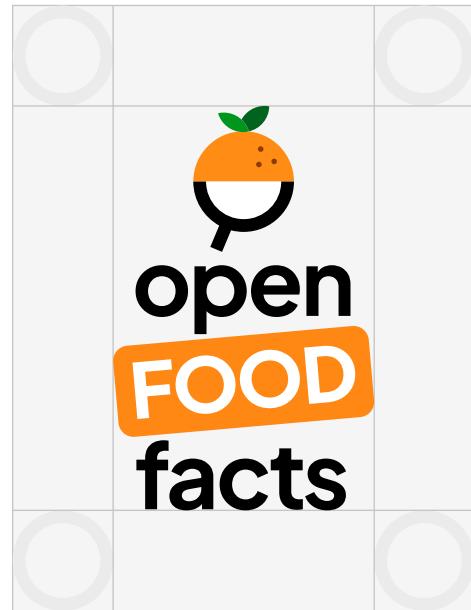

### MAIN LOGO - HORIZONTAL VERSION

### SINGLE ICON

### SECONDARY LOGO - VERTICAL VERSION

### SAFETY MARGIN

The logo safety margin/grid protection is here to protect the space around the logo, when it is placed on many supports or juxtaposed with other graphic elements.

It's important that no other element can be added in this area.

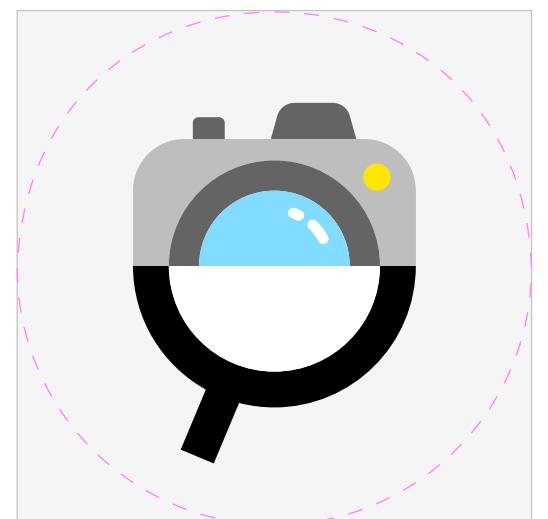

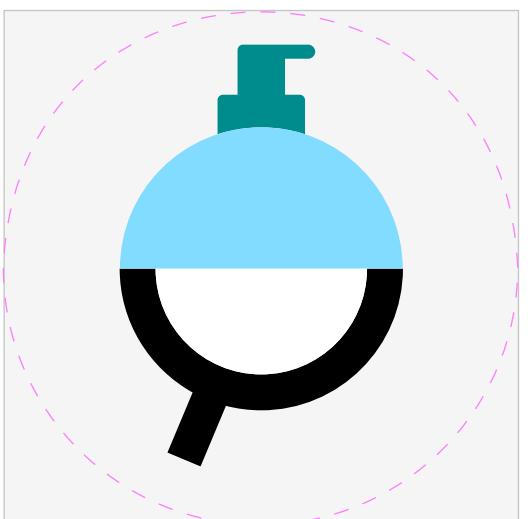

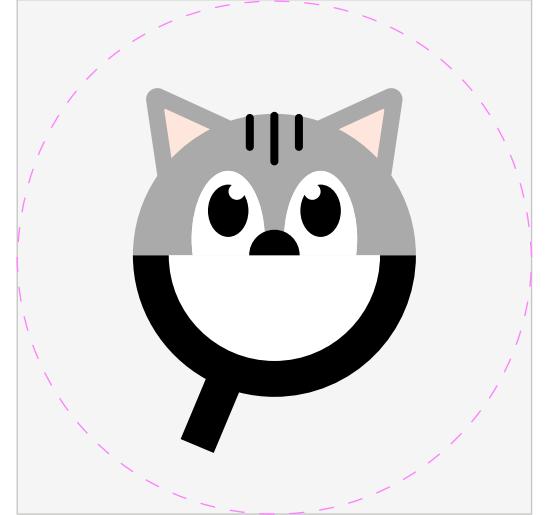

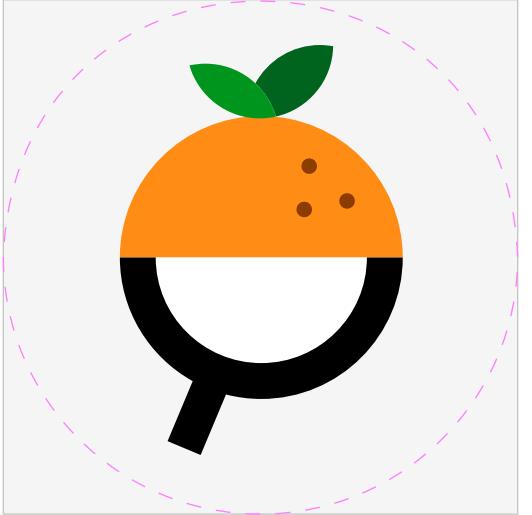

## ICONS FOR MOBILE APPLICATIONS

## RECOMMENDED ICON AS FAVICON

It is strongly recommended to use the most synthetic version of the logo (here the favicon) for small areas of expression such as the icon of your site in the address bar of a web browser. This way you guarantee a better readability and efficiency of your logo on a small scale.
